Herkimer Family Nurse Practitioners PLLC

Pediatric and Adolescent Services

Welcome to your Medical Home

A **medical home** is a medical office where a team of professionals work together to provide and coordinate your health care across multiple settings. Your medical team includes your health care provider, family or others who support you, and you. Patient centered medical care is based on **YOU** being the most important aspect in your care and we value you being part of your care.

The nurse practitioners, medical staff, pt care techs and you will work together to provide management and treatment. Medical staff will meet you at the desk, ask for your name, phone number, contact, and insurance information. Patient care techs will assist with rooming patient and obtaining vital signs.

Medical staff will also make reminder calls, answer your phone calls, and general reception duties. We will work together as team to keep our patients healthy and provide high quality healthcare and friendly customer service in a safe and clean environment

We will help you coordinate referrals to specialists when needed including medical, mental health, behavioral, and oral health. We are available 24/7 by phone service by calling 315-219-5526.

We encourage you to be an advocate in your own health care and we provide Medent for patient access to records, immunizations, or direct messaging with our staff.

We use the latest evidence based research and most current guidelines to provide quality based care

Our Products
